HIGH TRAIL
EDITION

Big, Lifted Performance

The Traxxas lineup of exciting and capable High Trail TRX-4® models is expanding with the all-new 1979 Ford® F-150® truck. Sporting top-of-the-line Ranger XLT trim, the Ford F-150 High Trail is equipped with a factory-installed Long Arm Lift Kit and stands over an inch taller than our standard height TRX-4. The exceptional all-terrain capability, smooth running drivetrain, and Traxxas Tough durability drivers expect from TRX-4 are all there. Black roll bar, chrome light housings, longer wheelbase, and slotted aluminum-finish mags complete the authentic, period correct look.
