

castle CONNECTOR

Power Hungry? Go Green!

Polarized connectors have a place in the hearts of many modelers as they make it impossible to destroy their expensive electronics and batteries by plugging them in backwards. However, they have been lacking a connector capable of extremely high currents, constantly having to increase their voltage to maintain amperage levels. But what do you do when you're maxed out on voltage and your setup requires more amperage than battery connectors on the market will handle? What if you don't want to or can't increase your voltage due to size constraints or competition rules? The answer is simple, you go green. The new Castle Creations polarized connectors will handle up to 200 amps of continuous current (for the 6.5mm version; 75 amps for the 4.0mm connectors) without breaking a sweat at any voltage level used in R/C applications.

These are the highest rated polarized connector on the market. Not only that, but they're user friendly too! We've added ridges to the housing making them easier to grip, they accept up to massive 6 AWG wire, and we've marked them for "Battery" and "ESC" for easy reference. Batteries and ESCs aren't the only things they're useful for though. Use them on your charger leads, parallel and series harnesses, high current amp/watt meters, and anything else that needs super high current. ***They're what "going green" should REALLY mean!***

CONNECTORS 6.5mm
6 Male Connectors • 3 Housings

castle BULLET

If you want something done right, you usually have to do it yourself. We were never totally satisfied with the options for bullet connectors for our high power applications, so we designed and manufactured our own. CC Bullets make the connection, every time. Simple as that. Available in a lovely shade of gold and made in four sizes: 4mm, 5.5mm, and 6.5mm, and 8mm

CC-BULLET 4.0MM
BULLET CONNECTORS 4.0MM
3 Male • 3 Female Connectors
75A max current

CC-BULLET 5.5MM
BULLET CONNECTORS 5.5MM
3 Male • 3 Female Connectors
150A max current

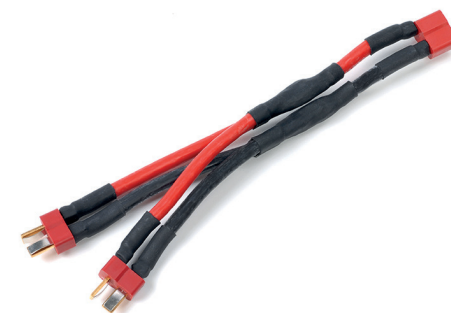

CC-BULLET 6.5MM
BULLET CONNECTORS 6.5MM
3 Male • 3 Female Connectors
200A max current

CC-BULLET 8.0MM
BULLET CONNECTORS 8.0MM
3 Male • 3 Female Connectors
300A max current

castle WIRE HARNESS

011-0006-00
PARALLEL WIRE HARNESS
Heavy duty 10AWG silicon wire
Deans connectors
60A max current

011-0002-00
SERIES WIRE HARNESS
Heavy duty 10AWG silicon wire
Deans connectors
60A max current
